To discover spurious greenbacks or national bank notes, divide the last two figures of the number on the bill by our, and if one remains the letter on the bill will be A; if two remains, the letter will be B; if three remains, the letter will be C; should there be no remainder, the letter will be D. For example: A note is registered 2,461; divide 61 by 4 and you will have one remaining. According to the rule the letter on the note will be A. In case this rule fails it is certain that the note is counterfait or altered. Ex

> A fraud is being perpetratated upon the school districts. An agent comes along soliciting orders for charts and other school apparatus, amounting to \$35, and forges the name of the director or some other member of the board. He then visits the other members, who seeing the name of one of their number already attached to the order, do not hesitate to place their signatures to the order. The agent represents that the state will pay for these necessaries, but in course of time the school district will find that they have to root the bill. We say, beware, and look out for the sharper, for such he is.
